DETAILED ACTION

This is the second office action for U.S. Application 09/870,019 for a Motor Mount filed by James E. Doyle et al. on May 30, 2001.

Drawings

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on October 29, 2002 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the embodiment wherein the thrust bearing and washer are the only holding means between the motor assembly and the base must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3632

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1, 10, and 19 recite the limitation "a thrust bearing and washer extending between said base and said drive screw for providing the only holding connection for said motor assembly to said base". However there is another holding connection between the motor assembly and base (the pin and grommet connection). It is not clear how Applicant's invention functions with the thrust bearing and washer being the only holding connection for the motor assembly to the base because every embodiment shown and described by Applicant has more than one holding connection. The limitation is not understood and therefore art is not being applied to the claims. The absence of applied art is not an indication of allowable subject matter.

Response to Arguments

Applicant's arguments filed October 29, 2002 have been fully considered but they are not persuasive. Applicant argues that the Applicant's disclosure in view of the Baker reference does not disclose a thrust bearing and washer as the only holding connection for the motor assembly to the base. However, Applicant's motor assembly has one than more holding connection between the base and motor assembly because there is also a pin-grommet connection between the two.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
